Freddy Shaikh

SENIOR FULL STACK SOFTWARE ENGINEER

Toronto, Canada

+1(437) 267-3291 | shaikhfh1@gmail.com | freddyshaikh.com | Freddy-S3 | freddy-shaikh

Summary

Senior Full Stack Software Engineer and designated technical lead for AI-driven engineering acceleration, with 7+ years building production systems across .NET, Python, Vue, and AWS. At Morningstar, architected the team's AI-assisted engineering harness, worked with MCP (Model Context Protocol) servers, and owned an LLM-driven audio feature using Amazon Bedrock and Polly. Owns delivery end to end across distributed systems, REST and GraphQL APIs, Harness CI/CD, and cloud infrastructure.

Skills

AI & Agentic	LLM Orchestration, Bedrock, MCP (Model Context Protocol), Agentic Harnesses, Prompt Engineering, Answer Engine Optimization (AEO), SEO
Languages	Python, Go, Java, C#, TypeScript, JavaScript, SQL, PowerShell, Bash, Gremlin (Graph Query)
Application	Microservices, Distributed Systems, REST, GraphQL, .NET, Spring Boot, Vue 3, Test Automation, Tableau, Graph Databases
Cloud & Platform	AWS (Lambda, ECS, S3, CloudFront, Bedrock, Polly), GCP, Docker, Kubernetes, Terraform, CI/CD, IaC

Experience

Morningstar — *Toronto, Canada*

SENIOR FULL STACK SOFTWARE ENGINEER — *January 2025 - PRESENT*

- Designated lead for AI-driven engineering acceleration: architected the team's AI-assisted engineering harness (skill files, scoped context and token budgets, operating-mode guardrails) and mentored senior and principal engineers onto it as their default workflow.
- Technical SME for MCP (Model Context Protocol) server architecture, from proposal through production release.
- Owned end-to-end delivery of an AI audio feature: .NET services on AWS Bedrock and Polly for LLM-driven SSML synthesis, plus the Vue UI shipping transcript and smart-summary output.
- Built a GraphQL API over a knowledge graph, improving content discoverability across the platform.
- Designed Harness CI/CD pipelines in YAML for AWS Lambda and ECS deploys, cutting deployment time.
- Built an automated Playwright test suite covering smoke, unit, and integration tests.

Santoku Corporation / Rimm.ai — *Toronto, Canada*

SOFTWARE ENGINEER — *August 2019 - January 2025*

- Led the rearchitecture of a monolithic on-premises application into AWS microservices on Docker and Kubernetes.
- Owned custom haptic VR training systems for enterprise clients end-to-end as primary technical decision-maker.

Japan Exchange Teaching (JET) Program — *Tokyo, Japan*

ENGLISH LANGUAGE TEACHER — *August 2018 - August 2019*

- Taught 1,000+ elementary and 500 middle school students, adapting curriculum using self-taught Japanese (JLPT N2).

Projects

Agentic Engineering Harness (GitHub)

- Provider-neutral harness for autonomous coding agents across Copilot, Claude Code, and Codex: operating modes for supervised vs. unattended posture, plus a usage-limit-aware queue that resumes after rate-limit resets.
- Concurrency and recovery model for parallel agents: exclusive working-tree claims with heartbeats and stale-claim takeover, git-worktree isolation, and compare-and-swap writes to shared state - enforced by a pre-commit hook that rejects an unclaimed agent write, with task state journaled before each risky step so an interrupted run resumes deterministically.

Portfolio Site & Resume Pipeline (freddyshaikh.com)

- Single-source-of-truth pipeline: Python generators cascade one LaTeX source into the site, the PDF, and ATS / JSON Resume / LinkedIn exports, CI-verified with Playwright.

Certifications & Education

2026 **AWS Certified Machine Learning Engineer - Associate**, AWS Training and Certification

2025 **AWS Certified AI Practitioner**, AWS Training and Certification

2024 **Google Cloud Certified: Professional Cloud Architect**, Google Cloud Certification

2023 **AWS Certified Solutions Architect - Professional**, AWS Training and Certification

2018 **Bachelor of Honors Science - Kinesiology**, McMaster University — *Hamilton, Canada*
