Summary

Senior Full Stack Software Engineer with 7+ years delivering cloud-native systems on AWS and turning emerging AI capabilities into reliable engineering practice. At Morningstar, I lead end-to-end AI product delivery, including an article-to-audio platform built with AWS Bedrock, Amazon Polly, .NET, and Vue, while architecting REST APIs and Harness CI/CD. I build repeatable AI-assisted engineering workflows through skill files, scoped context, and disciplined token management. A self-directed learner who taught himself programming, Japanese, and French, I translate current AI research and documentation into practical team capability.

Skills

Languages	Python, Go, Java, JavaScript, TypeScript, C#, SQL, PowerShell, Bash, HTML, CSS, VBA, Gremlin (Graph Query)
Frameworks & Tools	AWS (Lambda, ECS, S3, CloudFront, Bedrock, Polly), GCP, Vue, .NET, Docker, Terraform, Kubernetes, Git, Harness CI/CD, Postman, Jupyter Notebook
AI & Agentic	AI-Assisted Engineering Harnesses & Workflows, MCP (Model Context Protocol), GitHub Copilot / LLM Orchestration, AI Skill Authoring, Prompt Engineering, Context Design & Token Management
Concepts	API Development, CI/CD, Infrastructure as Code (IaC), Test-Driven Development, REST, GraphQL, Scrum, Agile

Experience

Morningstar

Toronto, Canada

FULL STACK SOFTWARE ENGINEER

January 2025 - PRESENT

- Architected RESTful APIs powering a Vue-based browser extension, enabling real-time communication between the front end and distributed .NET Lambda back-end services.
- Pioneered repeatable AI-assisted engineering workflows across the team by authoring AI skill files, designing scoped LLM context and token budgets, and mentoring teammates on AI-augmented development practices.
- Designed and deployed Harness CI/CD pipelines with Infrastructure as Code, reducing AWS Lambda and ECS deployment time by 80%.
- Led MCP (Model Context Protocol) server feature implementation as Project Manager and Subject Matter Expert, coordinating architecture, development, and production release.
- Owned end-to-end delivery of an AI audio generation feature, architecting .NET services that use AWS Bedrock for LLM-driven SSML generation and Amazon Polly for audio synthesis; built the Vue browser-extension UI and shipped transcript, smart-summary, and flash-briefing formats.
- Built a GraphQL API over a knowledge graph to model and query concept relationships, improving content discoverability across the platform.
- Authored reusable, parameterized scripts that automated recurring administrative workflows and reduced manual effort.
- Led the Asian/Pacific Islander Association (APIA) Employee Resource Group, championing inclusion and belonging across the engineering organization.

Santoku Corporation / Rimm.ai

Toronto, Canada

SOFTWARE ENGINEER

August 2019 - January 2025

- Rearchitected a monolithic on-premises application into AWS cloud microservices, improving uptime, scalability, and maintainability.
- Designed and delivered custom haptic VR training systems end-to-end; consulted directly with enterprise clients to define requirements and iterate on software solutions.
- Refactored a legacy codebase to object-oriented architecture, increasing code reuse and reducing the defect surface area.

Japan Exchange Teaching (JET) Program

Tokyo, Japan

ENGLISH LANGUAGE TEACHER

August 2018 - August 2019

- Delivered English language instruction to over 1,000 elementary and 500 middle school students; leveraged self-taught Japanese to adapt curriculum and communicate effectively across diverse learning needs.

Projects

Agentic Engineering Harness

- Authored a personal AI engineering harness: 30+ composable skill files that define planning, debugging, review, and delivery workflows for coding agents, with explicit operating modes and escalation rules.
- Engineered scoped context and token budgets, MCP tool integration, and self-improving instruction files; the same practices I introduced to my team at Morningstar.

Portfolio Site & Resume Pipeline (freddyshaikh.com)

- Built and deployed a personal site with JavaScript, SCSS, and AWS CloudFront; a Python generator cascades this LaTeX resume into the site, PDF, and job-board exports from one source of truth.
- Automated the release with GitHub Actions and a Playwright browser suite asserting rendering, colour contrast, and responsive layout on every push.

Certifications & Awards

2026	AWS Certified Machine Learning Engineer - Associate , AWS Training and Certification	<i>Toronto, Canada</i>
2025	AWS Certified AI Practitioner , AWS Training and Certification	<i>Toronto, Canada</i>
2025	AWS Certified Developer - Associate , AWS Training and Certification	<i>Toronto, Canada</i>
2024	Google Cloud Certified: Professional Cloud Architect , Google Cloud Certification	<i>Toronto, Canada</i>
2023	AWS Certified Solutions Architect - Professional , AWS Training and Certification	<i>Toronto, Canada</i>
2019	Japanese-Language Proficiency Test (JLPT) - N2 , Japanese Language Proficiency Test	<i>Tokyo, Japan</i>
2018	TEFL Teaching Certification , University of Toronto	<i>Toronto, Canada</i>

Education

McMaster University

BACHELOR OF HONORS SCIENCE - KINESIOLOGY

Hamilton, Canada
September 2014 - April 2018
